Warranty Certificate

Class E system (Cat. 6)

15 years functionality - and material guarantee is hereby covering the installation:

10.12.2006	“Интайм” ООД	Bulgaria, Sofia, 41 “Nedelch Bonchev “
Date of installation	Company	Address
<hr/>		
“Argo Contar – Milko Draganov”		
Installer		Signature

Schneider Electric Bulgaria issues the above warranty subject to the following conditions:

The installation is guaranteed to have a bandwidth of min. 250 MHz, taking into account the electrical parameters specified in the above-mentioned standards.

The spare parts guaranty ensures that the Infra Plus installation can be expanded and repaired with identical or compatible components for a period of 15 years. Schneider Electric reserves the right to supply components of equivalent or higher performance.

In order for the guaranty to apply, the entire Infra Plus installation or those parts that it is wished to include in the functionality guaranty must be verified and installed in accordance with the standards EN 50346 and EN 50174.

If all or parts of the installation are changed or upgraded, this must be carried out in accordance with the instructions applicable to the original installation, and a new Infra Plus functionality certificate must be issued in respect of the change to the installation. If another building installation is to be integrated electrically or physically in the building network, this must be approved and tested by Bulgaria.

The guaranty conditions overleaf also apply.
